

Premium Brand Doors & Windows

Alpwood™ manufactures APL brands which are designed, engineered and tested to exacting standards.

Smartwood™ - a superior choice:

The use of natural timber brings instant style to the interior of your home while meeting the contemporary needs for environmental quality by minimizing condensation and heat loss and saving on energy costs. The aluminium exterior provides attractive good looks while retaining a high quality, hardwearing, tough and low maintenance finish. [Smartwood providing elegance with toughness...](#)

APL Architectural Series: Perfect for architecturally designed homes and apartments, this range of high performance windows and doors is both modern and meticulous in design. [The system has been developed with aesthetic unity in mind...](#)

Metro Series Thermal Heart™ is the technology that lies at the heart of a new thermally efficient range of aluminium windows and doors. [Help meet building code requirements for thermal efficiency...](#)

Metro Series: A stylish and versatile range of windows and doors based on a unified and contemporary design approach. Suitable for residential and architectural applications in demanding environments. [Metro Series Residential Joinery designed to reflect a co-ordinated aesthetic to suit architectural applications...](#)

FIRST Windows & Doors™ is an innovative, contemporary, residential range which recognises the realities of current building and design – as well as the sometimes harsh realities of the New Zealand climate. [Meet challenges of the climate and the budget ...](#)

Whatever your needs are, we'll be able to create the right windows and doors for your home.
